

TANKER BERTH USERS, SHIPPING LINES AND AGENTS

REF : DPA/150/07/2000

TANKER REGULATIONS

Dubai Ports Authority confirm that oil tankers of 20,000 tons dwt and upwards, but less than 40,000 tons dwt, carrying petroleum products other than crude oil, which have a flash point of 60 degrees Celsius or less which are not fitted with an Inert Gas System (IGS) will be required to have an equivalent fixed installation in accordance with the SOLAS regulations.

Tankers not in compliance with the above directive will be refused permission to either load or discharge the said cargoes.
